DETAILED ACTION

Continued Examination Under 37 CFR 1.114

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on May 23, 2005 has been entered.

EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Joseph T. Grunkemeyer on September 12, 2005.

The application has been amended as follows:

In claim 15, line 7, [homogenous] has been removed. In the same line, the phrase [a material] has been replaced with --either a single compound or a homogenous mixture of different compounds--.

In claim 26, line 5, [homogenous] has been removed. In the same line, the phrase [a material] has been replaced with --either a single compound or a homogenous mixture of different compounds--.

Support for this limitation can be found on page 9, lines 20-21 of the specification.

Allowable Subject Matter

Claims 15-26 and 29-31, 33, 34, and 37-39 are allowed.

The following is an examiner's statement of reasons for allowance: Applicant's arguments filed May 23, 2005 have been found convincing. As indicated in the Interview Summary of May 23, 2005, the prior art requires a multi-layer arrangement of dissimilar compounds as the source material. In particular, the rejection was based upon the source material comprising a metal and a polymer that was explicitly not homogenous. The transformation removed the polymer, resulting in the material of interest. This interpretation can no longer be applied to the presently drafted claims. Therefore, the rejection has been withdrawn.

In an updated search on September 9, 2005, the examiner has determined that the prior art fails to teach, or make obvious, the combination of limitations of using a first laser to transfer either a single compound or a homogenous mixture of compounds such

Art Unit: 1762

that the material deposited is the source material (i.e. no transformation occurs by the first laser) and then using a second laser to transform the source material on the receiving substrate to the material of interest. Therefore, the claims have been determined to be allowable.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Drawings

New corrected drawings in compliance with 37 CFR 1.121(d) are required in this application because the case is allowable, however the current drawings are informal. Applicant is advised to employ the services of a competent patent draftsperson outside the Office, as the U.S. Patent and Trademark Office no longer prepares new drawings. The corrected drawings are required in reply to the Office action to avoid abandonment of the application. The requirement for corrected drawings will not be held in abeyance.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Eric B. Fuller whose telephone number is (571) 272-1420. The examiner can normally be reached on Mondays through Thursdays.

Art Unit: 1762

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Tim Meeks, can be reached on (571) 272-1423. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
